SUMMARY

New-grad software engineer with backend internship experience and a focus on reliability and performance. Comfortable owning a feature from design through tested, shipped code.

EDUCATION

B.S. in Computer Science, State University, 2026. GPA 3.6.

Relevant coursework: Algorithms, Databases, Operating Systems, Distributed Systems.

EXPERIENCE

Software Engineering Intern, Mid-Size SaaS Company *Summer 2025*

- Built and reviewed REST API endpoints in Python for a customer-facing product.
- Raised automated test coverage on the team's core service and reduced regressions.
- Designed and shipped a caching layer that cut a slow endpoint from 1.2s to 300ms.

Teaching Assistant, Data Structures, State University *2024 to 2026*

- Led weekly lab sections for roughly 40 students and held office hours.
- Graded assignments and gave written feedback on code quality and correctness.

PROJECTS

- Capstone: full-stack study-group matching app (React, Node, PostgreSQL) used by 200 classmates.
- Open-source: contributor to a CLI tool with 4 merged pull requests.

SKILLS

Python · JavaScript · SQL · Git · REST APIs · Unit testing · AWS (basic)

SAMPLE RESUME — FOR STRUCTURE AND INSPIRATION ONLY. This is a fictional example from the Emerging Technologies Laboratory to show how a strong, early-career resume is organized. Replace every line with your own real, verifiable information. Follow any formatting rules required by your program, career center, or target employer over this example.
